Problem Statement 4

BolHisab

हिसाब अब बोलकर — just speak.

Speak in Hinglish, Hindi or English — BolHisab hears the sale, confirms aloud, makes the GST bill, chases payment.

Team BolHisab · Gurvinder Singh

Hisaab in a notebook. Dues in the dark.

“Poore din 20 bills likhta hoon. Phone aata hai to dhundhna padta hai — kisko kitna baaki hai, bhool jaata hoon.”

Rakesh, 45, packaging unit owner, Pune

6.3 crore

MSMEs in India. Most still track udhaar on paper or WhatsApp, not software.

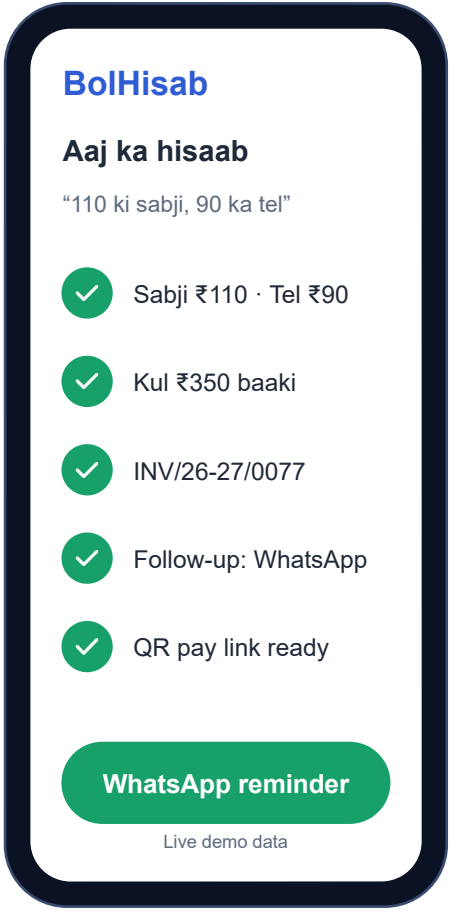

₹8,600 cr

locked in delayed MSME payments — earned but stuck (est.)

Bolo. Confirm karo. Bill ban gaya.

BolHisab hears the sale, speaks the review back, saves only on your “haan”. Tap or type always works.

- Voice-first in Hinglish, Hindi and English
- GST bills, chase ladder and forecast built in
- Customer pay link: every item, self-verified

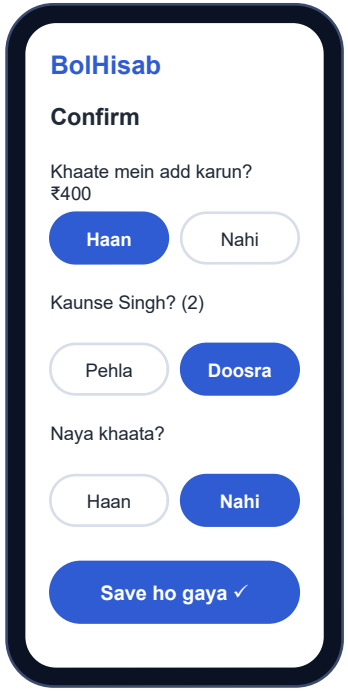

From spoken sale to bill in three steps

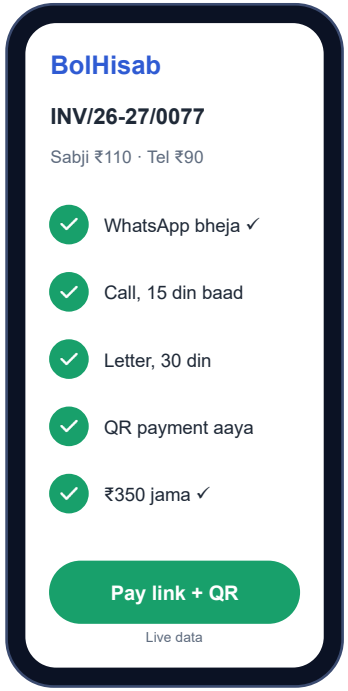

1 Bolo — apni bhasha mein

2 Confirm — “haan” ya “nahi”

3 Bill bana — share, chase, vasooli

Architecture: LLM extracts, engine computes

The stack

Next.js 15 web app

One codebase for web + Android (Capacitor shell).

Supabase

Postgres book + Realtime sync + Auth login.

Gemini (server-side)

Audio to intent only. Key never leaves the server.

Real

- Money + GST engine
- GST bills + words
- Bank match (6 cases)
- 13-week forecast

Simulated

- Seeded demo data, not live shops
- Auth real; RLS open for demo

Who it helps, and what comes next

Who it helps

Small manufacturers

Owners who sell on credit daily and file GST — crores of MSMEs, mostly without software.

Traders & suppliers

Whose khata runs in notebooks and WhatsApp voice notes.

Their accountants

Who reconcile bank statements and payments every month.

What we would build next

1. Row-level security and real accounts, one per shop
2. More languages + WhatsApp bot
3. e-Invoice IRP + live bank feeds via API
